Dear Sir or Madam;

I am pleased to endorse the "Unlocking the mind of a Winner" curriculum designed by Civil Society. I have known Mr. Alfred Frazier for over one year and always found him, and his team dependable, efficient and unfailingly punctual. To be honest, I have never worked with a person who gives so much of attention to every detail he works on. He is not only thorough but also easy to work with and always willing to take the time to discuss my concerns and respond to questions. If you have examined this curriculum, I am certain the content speaks to his ability.

"Unlocking the mind of a Winner" curriculum is designed to reach each student on a level that will positively affect him/her with the desired and intentional goal of success. It has been tested with some of the students at Jack Yates High School and we have seen a growth in some of our most challenged students. This is an impressive tool, and I would love to see this curriculum reach more students.

I recommend Alfred Frazier for any role through which he can contribute his remarkable creativity and dedication. If contracted to provide his curriculum, I am confident that Mr. Frazier's Unlocking the mind of a Winner will help your students soar to new heights.

If you have any further questions, please feel free to contact me.

Best,

Danielle Turner, MBA
